

Custom Online Loan Applications

CUSTOMIZED, PRE-POPULATED LOAN APPLICATION DATA STREAMLINES LOAN ORIENTATION

Expedite Decisioning

We offer two fully customizable loan applications- a branch/ Intranet solution and an online Internet solution- that support fast, easy loan application completion and facilitate sharing of information to expedite the decisioning process.

How It Works

A branch manager with a prospective customer can access your customized intranet or Internet web form and submit an application. The application data is exported to the Baker Hill NextGen® Loan Origination system and either placed in a queue for review by an underwriter or automatically decided. Following submission, the branch manager can see the decision and underwriter comments, associated credit reports, and documents from the loan origination system. The branch manager can then submit comments to the underwriting team or attach additional documentation.

Key Benefits

- Online loan application forms can be quickly deployed to branch networks or directly to customers through online banking
- Flexibility in user interface design for loan application forms
- Minimize training required for users who input applications

Add this powerful tool to your Baker Hill NextGen® Loan Origination platform. To learn more, visit www.bakerhill.com/loanapps.
